Product highlights

ImagEn technology

ImagEn is exclusive Philips photo enhancement technology that automatically analyses your photos to correct colour and adjust for optimal contrast. ImagEn separates colours to avoid "crosstalk" adjusts brightness distribution for great visual contrast and corrects Gamma for colour accuracy.

4:3 perfect frame ratio

Philips digital PhotoFrame ensures your photo to be displayed in 4:3 ratio for the best viewing experience.

RadiantColor

RadiantColor is an exclusive Philips technology for displaying smaller photos in the optimal 4:3 ratio by extending the colour on the edges of a less-than-full-screen photo to the sides of the screen, eliminating black bars and aspect ratio distortion.

Multiple-photo collage effect

It's a slideshow effect to show photos in collage form that automatically and randomly compiles different photos together to avoid unattractive borders that may result from photos which are smaller than screen size.

Multiple viewing modes

Flexible display modes give you the freedom to display your photos one image at a time, in thumbnail mode for quick, easy searches, or to create a slideshow of your most treasured photos.

Viewing photos in USB flash

A USB connector for easy viewing and sharing of photos stored on USB flash drive.

SmartPower

A timer turns PhotoFrame on and off at the hours you select, reducing energy consumption for the sake of our environment saving up to one third of your PhotoFrame energy costs. Three programmable weekday timeslots along with one weekend timeslot give you flexibility to fit your personal schedule.
